WINSLOW I—Timberland has added bold, two story designs to our Contemporary Collection. This three bedroom home fuses form and function for modern lifestyles—impressive street appeal and an open floor plan that allows continuous flow from one area to the next. The flex space off the kitchen is ideal for family gathering, computer or media center, and the fireplace adds intimacy to the great room. Your sheltered entry says “welcome home”. A loft space and viewing deck are featured on the second floor. The Winslow I makes a strong architectural statement with its innovative design.
