Display Model 1746 square feet

Model Home for Sale at Special Price

Texture and color flow through this home designed to make you feel at the water's edge, no matter where you're located. The interior features a palette of soft greens that evoke the feeling of grasses on the sand dunes and glass tiles that look as though they've been tumbled in seawater. Bedrooms are designed for that sense of serenity and the sunroom converts to a screen porch—it's perfect for outdoor dining and flexible year round enjoyment.
